

REMARKS/ARGUMENTS

Formal Matters

The Examiner has noted that the use of the trademark penetratines in the substitute specification previously filed was improper in form as the generic terminology was deemed insufficient. Specifically, the Examiner notes that the use of the terminology “peptides” is insufficient because it could be any peptides and does not properly identify the product. Applicant has amended the claims, i.e., Claims 22 and 25, and Paragraph [0009] of the Specification to clarify the matter. Referring now to the attached Appendix A, Applicant now uses the term “antennapedia peptides,” which is the exact name of the material sold under the trademark PENETRATIN®. The reference to the trademark is eliminated in the claims to avoid the problems described in Manual for Patent Examining Procedure that recites: “The formula or characteristics of the product may change from time to time and yet it may continue to be sold under the same trademark.” (MPEP Section 608.01(v)). The Specification has been amended in a likewise manner and refers to PENETRATIN® as an example of a source for antennapedia peptides and then describes the name and address of the entity supplying this material. No new matter was added.

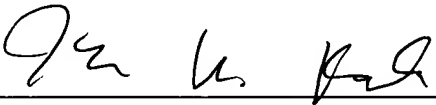

Appl. No. 09/913,788
Amdt. dated May 11, 2004
Reply to Ex-parte Quayle Action of March 19, 2004

If the Examiner should have any questions regarding this Reply, it is respectfully requested that Examiner please telephone Applicant's undersigned Attorney in this regard.

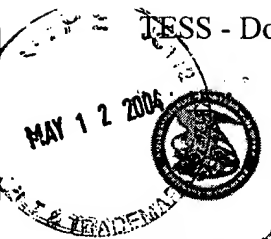

Respectfully submitted,

Date:

May 12, 2004
